

Professor Svetan Ratchev

Svetan Ratchev is a Professor in Manufacturing Engineering, Director of the Institute for Advanced Manufacturing and Director of the Nottingham Centre for Aerospace Manufacturing and the Nottingham Precision Manufacturing Centre. He researches and consults in key areas of precision manufacture including assembly automation, precision machining and distributed design and manufacture. Svetan is a Fellow of IMechE, member of the IFAC technical committees TC5.1 and TC5.2 and the founding chair of the International Precision Assembly Seminar IPAS. Svetan is the principal investigator of the EPSRC Cloud Manufacturing and Evolvable Assembly Systems research programmes, director of the EPSRC Manufacturing Technology Industrial Engineering Doctoral Centre and principal investigator and coordinator of the EU FP7 project PRIME - "Plug and Produce Intelligent Multi Agent Environment based on Standard Technology".
